

Help Make Evanston a Community Habitat for Birds and Butterflies

To Find out More, Email

Habitat@GreenerEvanston.Org

Could your yard or container garden provide birds and pollinators:

Food: Plants that produce nectar, seeds, berries, forage, or other food for butterflies and birds.

Water: A birdbath, puddling area for butterflies, rain garden, pond or lakefront.

Cover: Shrubs, a roosting box, a thicket.

A Place to Raise Young: A bush, nesting box, plants that host butterflies.

Healthy Habitat: Reduce pesticides and herbicides.
