

Through this program we are:

**Building community** by engaging community members in educational workshops, installing wildlife-friendly gardens at home and in the community and leading events such as Earth Day Celebration.

Engaging residents to take action to make their communities healthier, sustainable and wildlife-friendly.

Implementing **wildlife conservation strategies** across our community by creating corridors for wildlife, increasing the use of native plants and reducing chemicals.

**Beautifying our already beautiful community** by creating habitat for wildlife with native wildflowers, trees and shrubs; adding water features where possible; and welcoming wildlife such as butterflies and birds.

### Community Wildlife Habitat ®

Our community is registered in the National Wildlife Federation's Community Wildlife Habitat program. Through this program we are certifying homes, schools & religious institutions as wildlife habitats. **Support our efforts: certify your habitat!**

**Visit [nwf.org/certify](http://nwf.org/certify).** You will also get a NatureScape Broward sign for your yard or garden.

Each certified site within the community provides the four basic elements that all wildlife need: **food, water, cover and places for wildlife to raise their young**, while integrating sustainable gardening practices. It's Simple.

To learn more, visit **[nwf.org/gardenforwildlife](http://nwf.org/gardenforwildlife)**.

### Wildlife in Our Community:

Weston sits on the edge of the Everglades. As such, we are in a unique position to see a wealth of wildlife: winged, aquatic and land animals. Your backyard has an abundance of wildlife and natural beauty just waiting to be discovered.

# Healthy habitats and healthy communities go hand-in-hand.

*Quercus virginiana,*  
**Live Oak**

*Encyclia tampensis,*  
*Florida Native Orchid*

### Our Successes:

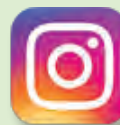

Weston joined the 'Million Orchid Project' in 2020, to help restore endangered native orchids in Broward County. Weston is a natural location for these native orchids which once thrived in S.FL and the Everglades. We have currently installed over 1,600 seedlings in trees throughout our parks and roadways.

Visit our webpage and follow us to stay updated on our community events and certify your habitat!

## City of Weston Community Wildlife Habitat®

The City of Weston has committed to supporting native wildlife and plant species by enhancing wildlife-friendly landscapes across Weston and building awareness through community events and educational outreach.

*Tripsacum dactyloides,*  
*Fakahatchee grass*
