HABITAT™**

## Harbor Island Wildlife Gardens

*A suggested list of Native  
Plants that can be grown on  
Harbor Island, SC*

*American Beauty Berry*

Harbor Island Wildlife Gardens is the name of our National Wildlife Federation Community Wildlife Habitat. A team of Environmental Stewardship Committee members and volunteers are working diligently toward certification of our community. This brochure is just one of the many projects undertaken to qualify for certification. If you have any questions about the project, how to certify your individual property or would like to volunteer, please contact one of our team members.
