

Old North State at Uwharrie Point

January 2, 2024

Habitat Conservation Program
Attn: Program Manager
North Carolina Wildlife Resources Commission
512 N. Salisbury Street
Raleigh, NC 27604-1188

We are writing to provide our 2023 annual report for the Uwharrie Point Community Wildlife Conservation Program. In 2022 your office confirmed that our community had met all the requirements of the original 1993 agreement and recommended an adjustment be made to the agreement. The program adjustment recommendations were to install extruder plates on selected bluebird box entrances and insure specific spacing distances between bird boxes. The adjustment was an effort to decrease monitoring requirements for bluebird populations and support species of greater conservation need such as the brown-headed and white-breasted nuthatches, house wrens, and Carolina chickadees.

The suggested adjustments to our program were completed in late 2022. The adjustments required the modification, relocation and cataloging of over 70 bird habitats in our program. The total number of tracked habitats in our program rose from 164 in 2022 to 234 in 2023.

During the past year, we continued to use our Google Sheets, Winged Habitat Observation Log to track and tabulate wildlife activity. We used our Google MyMaps, Wildlife Habitat Map, to adjust and verify spacing between bird boxes and more easily locate the tracked habitat boxes in our community.

Below is a snapshot of 2023 nesting activity:

| | | |
|----|-------------------------|---|
| 86 | Bluebird Boxes | 425 eggs observed 64 eggs lost to predators |
| 50 | Nuthatch Boxes | 12 nuthatch eggs 61 chickadee eggs 90 house wren eggs |
| 25 | Chickadee Poles | 95 chickadee eggs |
| 18 | Purple Martin Houses | 72 adult birds based upon 36 nests 175 estimated eggs/fledglings |
| 25 | Bat Boxes | 25 boxes show signs of bat activity |
| 35 | Duck Boxes (Wood duck) | 72 estimated eggs based upon nests |
| 1 | Duck Box (Mallard duck) | 12 estimated eggs based upon nest |
| 1 | Eagle Nesting Site | 3 eagles fledged |

Despite high numbers of bluebird eggs and chicks being lost due to predators and a decreased number of bluebird boxes, we had approximately the same number of eggs and bluebird fledglings observed in 2023 as we did in 2022. Half of the 50 newly converted nuthatch boxes were homes to several smaller bird species in our area. Chickadees and house wrens used most of the bird boxes with smaller entrances with just two of the converted boxes being used by brown-headed nuthatches. Our chickadee poles were very popular, but we did see some issues with moisture and bugs in a few of the nesting sites. Prior to the 2024 nesting season, adjustments will be made to all of the poles to minimize moisture and insect issues.

During the 2023 nesting season, we performed a wide variety of maintenance tasks on all of our habitat houses. Below is a listing of the major maintenance tasks performed:

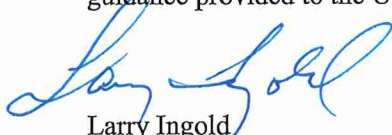

1. Constructed 25 bird boxes to replace deteriorating bluebird boxes
2. Replaced 12 small diameter metal support poles for bird boxes with 1¾"-2" steal poles
3. Installed stove pipe predator guards on six bluebird boxes and one nuthatch box
4. Constructed four wood duck boxes to replace deteriorating boxes and will repositioned three renovated boxes to new locations prior to the 2024 nesting season
5. Purchased two purple martin houses and repositioned several older purple martin houses to more desirable locations closer to the lake
6. Repaired woodpecker damage (holes) in 10 of our bat boxes and repainted where needed
7. Cleared debris from one of our wetland areas and installed a removable damn at drainage site
8. Cleaned all of our purple martin houses and installed door blocks to prevent unwanted nesting activity prior to purple martin arrivals in 2024
9. Cleared nesting materials and sanitized all community bird boxes in preparation for the 2024 nesting season
10. Began replacing plastic number tags on habit boxes with durable aluminum number tags

To promote and maintain our wildlife conservation program:

1. Participated in three Old North State Club sponsored kid's camps
2. Conducted several habitat sponsorship events to raise funding for our program
3. Promoted an ongoing photo campaign to document wildlife activity and made photos and videos available to community members on our association website
4. Promoted the use of our Google MyMaps, Habitat Map, and encouraged residents and family members to visit habitat locations
5. Produced a wildlife activity article each month that was published in our association's newsletter and available to residents of Uwharrie Point
6. Maintained a habitat display of available wildlife products and services our team provides at the community association office

In the coming year, we would like to gain support for establishing a pollinator garden, develop a plan to support our community wetlands, and would like to partner with local efforts to control and eliminate the growth of black algae on and around Badin Lake. Black algae is known to be toxic to all types of wildlife and is currently overtaking many of the coves located on the west side of the Uwharrie Point peninsula. This area is particularly important to our community wildlife conservation program as we have historically had large numbers of wood duck and purple martin nestings in this area each year.

Uwharrie Point residents and the Old North State Club staff and leadership continue to support our wildlife conservation program. This year we celebrated 30 years of protecting and promoting wildlife around the Uwharrie Point peninsula at Badin Lake. We look forward to springs return and enjoy seeing and sharing all the wildlife activity around our community. Thanks for your continued support and guidance provided to the Uwharrie Point Community Wildlife Conservation Program.

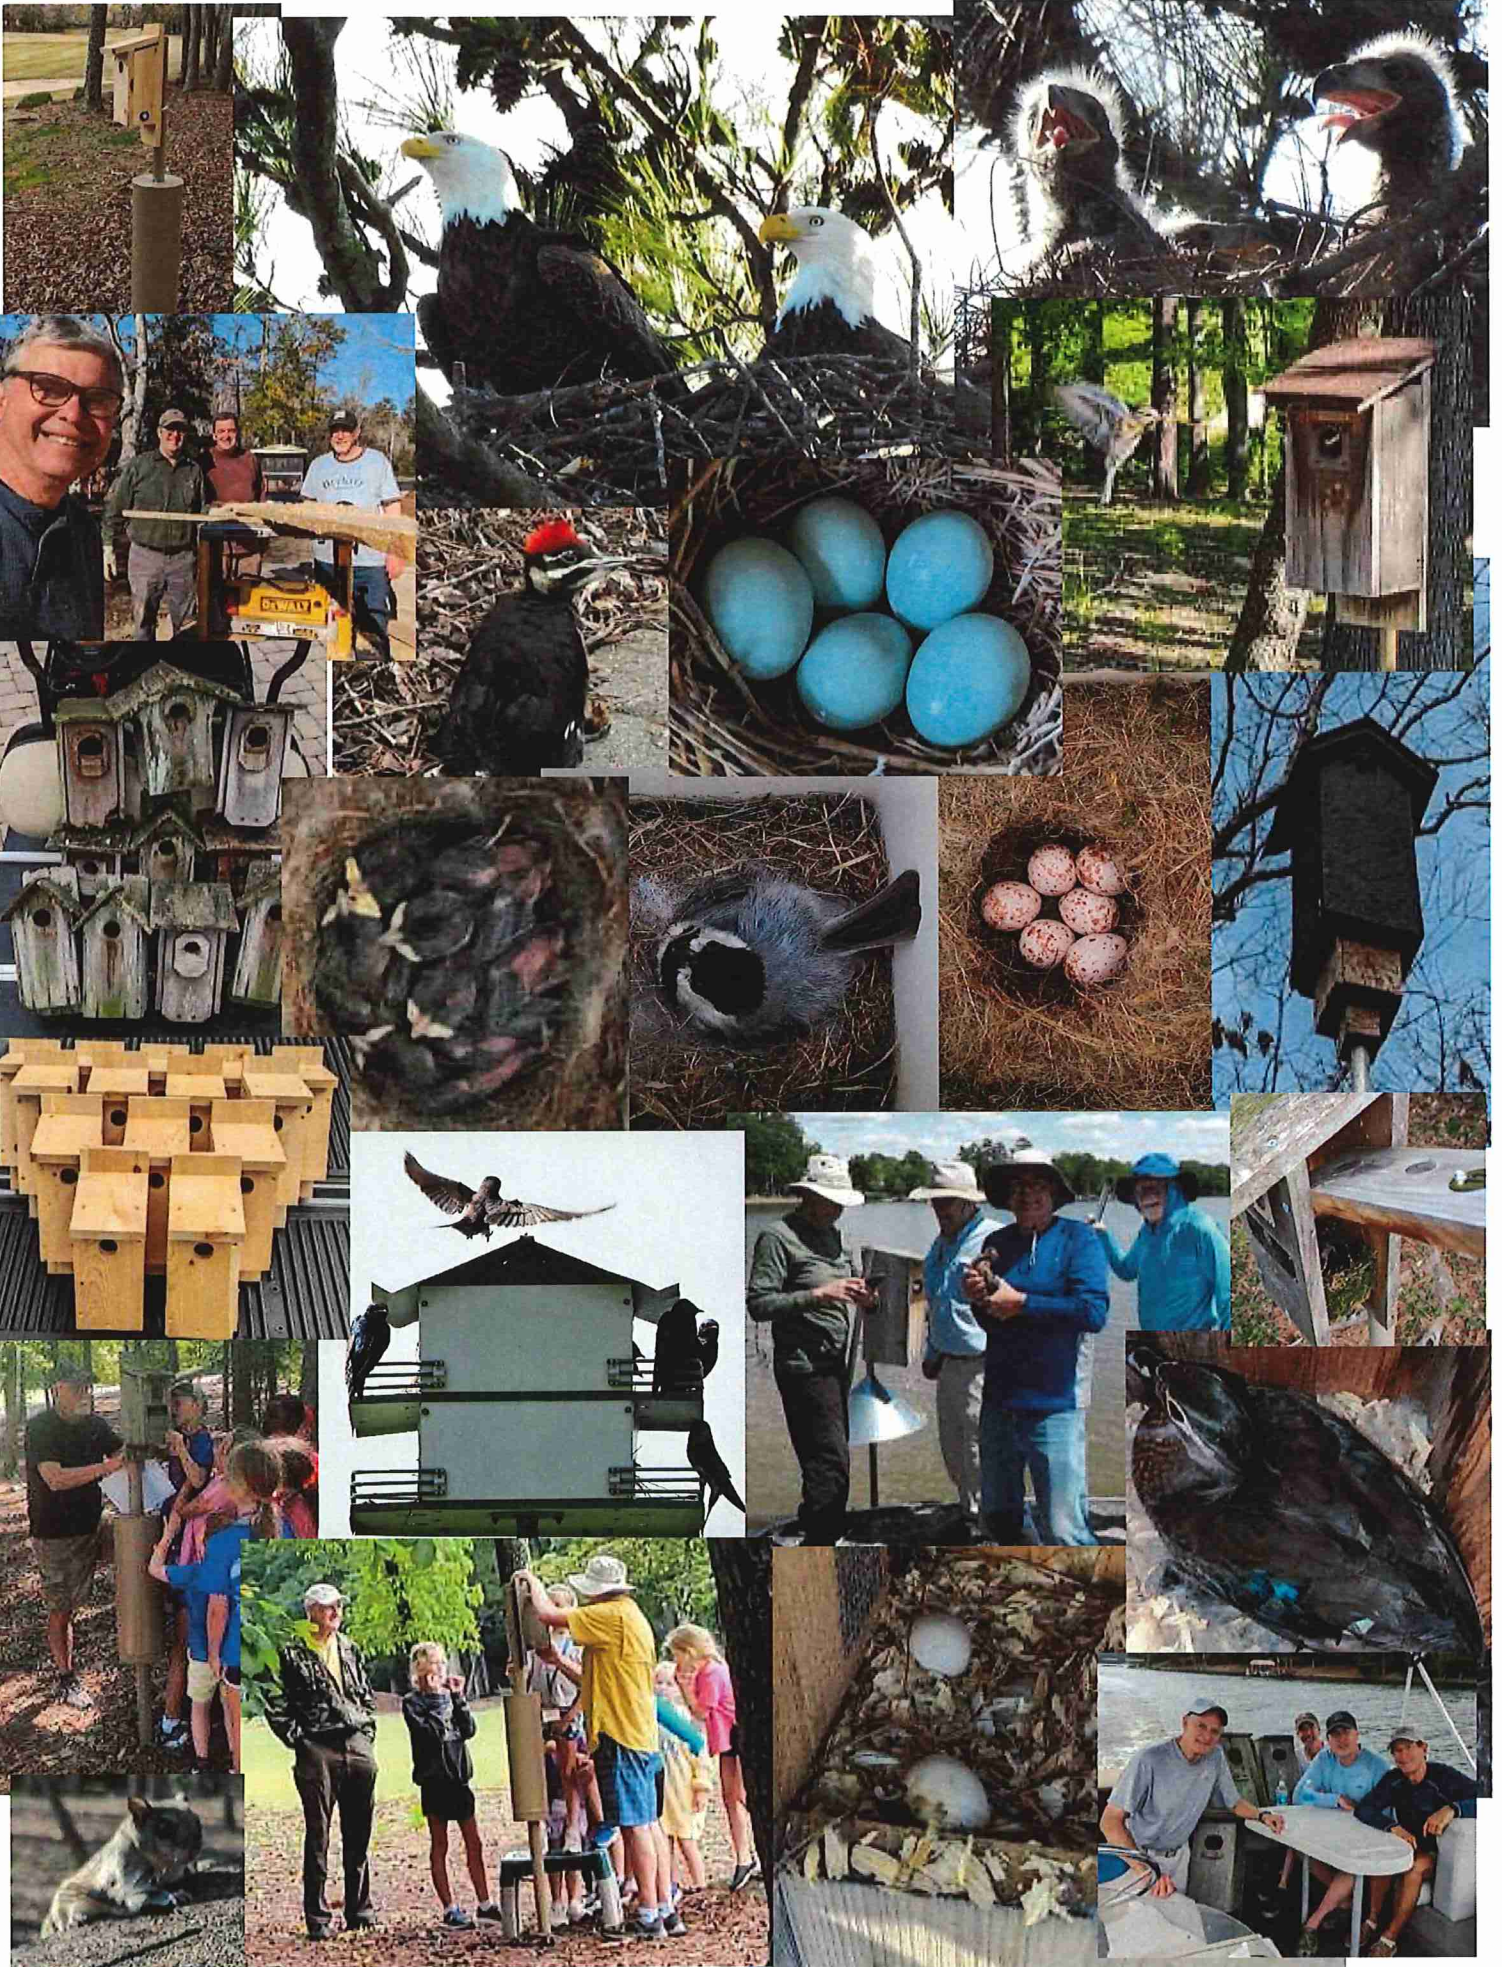

Larry Ingold
Uwharrie Point Wildlife Habitat Co-coordinator

John P. Ratliff, Jr.

| | | | | | | Bat observed roosting in Nuthatch box 11 on 7/26/2023 | |

| Date | Location | Number of Eagles | Eagle Activity | Observer (s) |
|-----------|----------|------------------|--|-------------------------------|
| 1/5/2023 | Hole #4 | 2 | Eagles engaged in a cloacal kiss (mating) | John Ratliff and Larry Ingold |
| 1/15/2023 | Hole #4 | 2 | Eagles sitting in nest | Helen Yu |
| 1/23/2023 | Hole #4 | 2 | Male eagle brought squirrel to nest for lunch | Helen Yu |
| 1/25/2023 | Hole #4 | 2 | Sitting in nest. One eagle squawking. | Helen Yu |
| 2/2/2023 | Hole #4 | 1 | Nest deeper and larger. Difficult to see eagles in nest. One eagle very low in nest and one sitting on branch above nest. May be on eggs! | Helen Yu |
| 2/7/2023 | Hole #4 | 1 | Observed one eagle carrying a small fish and landed in the nest. Approach to the nest was over the trees, not the golf course. | Laura Ratliff |
| 3/12/2023 | Hole #4 | 1 | Adult eagle standing up looking into middle of nest | John Ratliff |
| 3/24/2023 | Hole #4 | 4 | Mom and Dad feeding two eaglets | Helen Yu |
| 4/13/2023 | Hole #4 | 5 | Three eaglets visible in nest | Helen Yu |
| 4/28/2023 | Hole #4 | 3 | Three dark feathered eaglets visible in nest. | Helen Yu |
| 5/13/2023 | Hole #4 | 4 | Three mature adolescent eagles and adult bringing fish | Helen Yu |
| 5/25/2023 | Hole #4 | 5 | Most of nest removed by parents | John Ratliff |
| 6/7/2023 | Hole #4 | 4 | Three adolescence seen flying around community. One parent brought fish to old nest. Adolescents landed in old nest and most mature adolescent ate the fish in front of the other two. | Helen Yu |

| Date | Wetland Location | Activity | Maintenance Needs |
|------------|-------------------------------|--|---|
| 12/30/2022 | Duck Pond on Southpoint Lane | Removed beaver dams from spill way. Water level dropped about 14 inches and returned to original design heigh. | Fallen sticks in middle of pond area need to be removed. Also need to install some removable timbers in spill ways to allow for water height adjustments. |
| 01/18/2023 | Duck Pond on Southpoint Lane | Installed 6"x6" timbers in spill way to raise water 5.5" | Sticks still need removing |
| 01/23/2023 | Duck Pond on Southpoint Lane. | Water level raised | Sticks still need removing |
| 5/10/2023 | Duck Pond on Southpoint Lane. | water level bottom of timber damn | |
